Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 3-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 8-9 and 14 of U.S. Patent No. 5,645,114. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a slide staining apparatus having means for handling the slides, dispensing/aspirating fluids to the slides and heating the slide.

Claims 3-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 and 1-13 of U.S. Patent No. 6,096,271 and 6,183,693 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a slide staining apparatus having means for handling the slides, dispensing/aspirating fluids to the slides and heating the slide.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 3-16 are rejected under 35 U.S.C. 102(b,e) as being clearly anticipated by Rogers et al. or Tseung et al. respectively.

The Office has considered the subject matter of this application as going back to the 5,654,114 patent which has a filing date of 5/31/94.

The cited prior art teaches a slide staining method and apparatus where samples/stains are deposited on the slide, means to remove excess fluid from the slide and heating means.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rhett et al. teach an automated staining device that is attached to and controlled by a computer. Column 3 lines 34+ teach a robotic delivery system that delivers reagent, buffer solutions and air to the glass slides. The system consists of an X and Y axis delivery systems for controlling the orientation of the slide and a Z head

for dispensing the reagent, buffer solutions and air to the glass slides. Column 10 lines 57+ teach various incubation times which has been read on the claimed heater element.
